

Cryogenic solution Format & standards

Cryo labels are designed to perform at cryogenic temperatures and under difficult conditions, such as dry ice, steam sterilization. Characterized by very good adhesion for many years on glass, plastic (high and low surface energy), metals as well as greasy and dusty surfaces. Recommended for labeling laboratory identification vials, test tubes, steel, glass and PP plates applied at room temperature and exposed to cryogenic conditions. Cryo labels have been tested at Max Planck Institute in Germany. They also perform well on multiple freeze and thaw cycles, remaining waterproof and weatherproof.

SHAPE	SIZE (mm)	PRODUCTS
	31 x 15 ϕ 11	
	30 x 15	
	25 x 20	
	38 x 22	
	60 x 10	
	75 x 25	

Solutions

Cryogenic solution

These solutions are found in the following products

Labels for vials and test tubes

Labels for straw and tubes

Labels for vials for laboratory centrifuges

Labels for cryogenics racks
